Education

Indian Institute of Information Technology (IIIT), Nagpur Aug 2023 – May 2027
Bachelor of Technology in Computer Science and Engineering **CGPA: 7.65/10**
CBSE Board: Class XII – 84% | Class X – 83%

Technical Skills

Languages	C++, Python, JavaScript, Java, C, SQL
Core CS	Object-Oriented Programming, Operating Systems, DBMS, Computer Networks
Tools & Frameworks	Git, GitHub, React, Node.js, Express.js, Streamlit, LangChain, REST APIs, FAISS
Databases	MongoDB, MySQL

Experience

Global Finalist – HackIndia Hackathon [Live] *Jan 2025 – Sep 2025*
India's Biggest AI & Web3 Hackathon · 2900+ Participants

- Advanced to the **Global Finals** among 2900+ participants by building **summary.ai** — a deployed **Document Summarization & Retrieval System** (FastAPI + React) using RAG, LangChain, and Google Gemini API.
- Engineered a semantic search pipeline with **FAISS vector indexing** and **T5 summarization models**; layered Gemini API reasoning to reduce hallucination and improve retrieval accuracy.
- Presented the live, end-to-end system to **industry judges** from AI & Web3 domains; recognized among the **top teams globally** out of 2900+ participants.

3rd Place – Rebranding Wars Hackathon *2024*
6-Hour Hackathon · Rapid Ideation, UI/UX Design & Market Research

- Secured **3rd place** by rebranding **Zepto**'s visual identity – redesigned logo, color palette, typography, and overall design language within 6 hours.
- Conducted rapid **market research** and competitor analysis to ground design decisions in strategic thinking; delivered a complete brand pitch to a panel of judges.

Projects

AI Mock Interviewer [Live]

- Developed a full-stack AI mock interview platform using **React**, **FastAPI**, and MongoDB, building reusable React components and integrating REST APIs for real-time interview generation and evaluation.
- Built a **RAG pipeline** with **FAISS** vector indexing to enable context-aware follow-up questions by detecting weak topics from prior answers.
- Designed session-based interview flow with **MongoDB** storing question history, scores, and feedback — supporting 5-question progressive interviews with real-time evaluation on clarity, depth, and relevance.
- Deployed backend to **Railway** and frontend to **Vercel**, resolving production issues including Python version conflicts, MongoDB Atlas IP whitelisting, and secure API key management.

Knock (Social)

- Architected a Twitter-like backend with **Node.js**, **Express.js**, and **MongoDB**, supporting anonymous and public post feeds.
- Designed a **dual-identity architecture** to support privacy-preserving anonymous interactions.
- Secured authentication and authorization with **JWT**, preventing unauthorized access to user sessions and protected routes.
- Optimized **MongoDB schema design** for feed retrieval, structuring documents to minimize query complexity.

Achievements

- **LeetCode** – Max Rating: 1738. Solved **250+** problems across data structures, dynamic programming, and graphs.
- **CodeChef** – Max Rating: 1611 (3 Star). Maintained consistent performance across **40+** rated contests.
- **Codeforces** – Pupil (1240). Participated in **35+** rated rounds, strengthening problem-solving speed under contest conditions.
- Solved **850+** DSA problems across LeetCode, Codeforces, CodeChef, CSES, and NeetCode.

Leadership & Activities

- **Event Head, Flash Code Coding Contest (Dot-Slash Coding Club):** Organized a coding contest with **500+ registrations**, selecting **40 finalists**; handled problem setting, coordination, and execution.
- Coordinated a **team of 10 volunteers** across logistics, evaluation, and participant management.
- **Mentor, Winter of Code (Dot-Slash Coding Club):** Guided **5–6 students** in **Data Structures & Algorithms** and competitive programming through regular sessions.
- **Core Member, Dot-Slash Coding Club:** Selected among the **top 10 members**; contributed to mentoring and technical discussions.
